New Saskatchewan employment rules now in effect

Changes. Regulations stipulate people called to work outside of their scheduled shifts will have to be paid three times their hourly wage

New provincial labour regulations, including a stipulation indexing the minimum wage, went into effect on Tuesday.

The Saskatchewan Employment Act rolls together about a dozen pieces of labour legislation into one omnibus law.

The regulations say that interns are employees if they have the same duties as other workers, and must be paid.

"Employers were sometimes taking advantage of those people, saying, 'Well, you're an intern. Therefore you will not be paid for this,'" Labour Minister Don Morgan said at the legislature.

"So we've said, 'Interns, you're going to get paid.'"

The regulations create a separate class for student learners, such as student teachers who do work placements for educational programs.

People who are called to work outside of their scheduled shifts will have to be paid three times their hourly wages.

The regulations also say retail workers should get two consecutive days off and, when possible, one of those days should be a Saturday or a Sunday.

The Employment Act includes a section to be completed when the Supreme Court of Canada rules on a challenge to the province's essential services legislation.

The essential services law says employers can dictate which workers are so needed that they can't walk off the job. The Saskatchewan Federation of Labour has been challenging that legislation since it was passed in May 2008.

The labour federation said the regulations leave a number of questions, particularly on "issues of scope and supervisors," unanswered.

Federation president Larry Hubich said in a release that the Employment Act "could potentially mean that thousands of Saskatchewan people are driven out of their organizations, and that thousands more will be prohibited from exercising their constitutional right to join a union."

Under the Employment Act, the minimum wage indexation is the equal weighting of percentage changes in the consumer price index and average hourly wage for the previous year. The regulations also allow employers and workers to agree to average hours over one to four weeks, so an employee might work 160 hours over four weeks — with five eight-hour days a week, or four 10-hour days. Greener Regina

Send your waste to a better place this spring.

Let's all work together to meet our community's goal to reduce household waste from the landfill by 40 per cent by the end of 2015.

Household waste day – May 10

Bring your household waste to the City's Public Works Yard at 2425 4th Avenue on Saturday, May 10 from 9 a.m. to 4 p.m..

We will accept your household hazardous waste (such as fertilizers, aerosols and batteries), major appliances, specific electronics, rimless tires, clothes, toys, books and more.

Visit **Regina.ca** for the complete list of accepted items. We'll reuse, recycle or dispose of them in an environmentally-responsible manner.

The City is offering household waste day in partnership with Saskatchewan Scrap Tire Corporation, Salvation Army, Habitat for Humanity Re-Store and Saskatchewan Electronic Products Recycling Association.

Leaf and yard waste depots

Leaf and yard waste depots will be open Saturdays from May 3 to June 7. The City will accept leaves, plants, twigs and more. Branches from elm trees will not be accepted. Bring materials in paper bags or reusable containers. Visit **Regina.ca** for more information and depot locations.

Recycling for condos and apartments

Recycling is coming soon for all residents who live in condos and apartments and don't have recycling service. Paper, plastics #1-7, glass and tin will be accepted.

Property owners and condo associations will be required to arrange for recycling service by January 1, 2015. If you do not have recycling service yet, please follow up with your landlord or condo association to find out when your collection will begin.

Storm chaser documents deadly system in the U.S.

Twisters destroyed homes, schools.
Obama declares Arkansas a major disaster zone

MORGAN MODJESKI
morgan.modjeski@metronews.ca

A violent storm system in the southern United States has left more than 30 people dead — and Saskatchewan storm chaser Greg Johnson was one of those monitoring the deadly system.

Speaking to Metro from St. Paul International Airport in Minneapolis, Minn., on Tuesday, Johnson, a Regina resident, was chasing the system over the weekend with his three-person team.

He was in Vilonia, Ark., when a tornado touched down and said the scene was one of devastation, noting the destruction that follows the natural phenomena is the hardest part of the job.

"It's extremely difficult," he said.

"On Sunday night when we were in Vilonia … there were people that were killed that we witnessed."

"There were injuries of all kinds, including people being impaled by two-by-fours," he said. "It was like a war scene."

According to the Arkansas Department of Emergency Management, as of Monday night it's been confirmed 15 people were killed in the state.

Kathy Wright, public information officer with the department, said residents in the areas of Mayflower, Ark., and Vilonia, Ark. — which were hit hardest — are bouncing back.

"The damage was extensive (and) they are in the middle of the clean-up side of it at this point and trying to pull their lives back together."

Wright said those affected have received "overwhelming" support from private industries, churches and community groups.

"Attitudes are very positive as they work through a very difficult time," she said.

Mississippi, Texas, Alabama and Tennessee also reported fatalities.

On Tuesday, U.S. President Barack Obama declared the area a major disaster and ordered federal aid to supplement relief efforts.

Widow wants government insurance to compensate for husband's death

Man killed in car crash. Wife seeking payout under the Fatal Accidents Act told she's 'out of luck'

A Regina woman whose 68-year-old husband was killed in a car crash says Saskatchewan Government Insurance (SGI) won't compensate her because a drunk-driving charge against the man responsible for the collision was stayed.

Rosmarie Boxall says she's entitled to $60,000 under the Fatal Accidents Act, and that each of her three stepdaughters should get $30,000.

Boxall says she's been trying to get compensation from SGI since her husband, John, was killed in February 2013.

"It's a nightmare. You just can't get it out of your mind. You're just always reminded of it, and over and over," Boxall said on Tuesday at the legislature.

John Boxall's vehicle was hit by a stolen pickup truck speeding through a Regina intersection. He died at the scene.

Jordan Thomas Lee McNabb pleaded guilty to four charges, including criminal negligence causing death, but a charge of impaired driving causing death was stayed. Last December, McNabb was sentenced to 10 years in jail, although he received a one-year credit for time previously served.

Rosmarie Boxall said SGI has told her she's "out of luck" and can't receive compensation because there was no impaired-driving conviction — even though court heard that McNabb was drunk.

"And even with the trial and that, you go through all this stuff, you have to do everything to help them convict the guy and everything. Then you basically are left out hanging on a limb," she said.

"It was torture going through the trial and all that stuff, too. It's just crazy."

Boxall said she's not desperate for the money, but is fighting on the principle.

Donna Harpauer, minister responsible for SGI, suggested that her hands are tied because of the legislation.

"My advisers are (saying) that it is very prescriptive, that it's not discretionary," Harpauer said.

However, the minister says she wants a review of injury coverage, adding:

"If there is a case where there is no question that there was drinking and driving and someone else gets injured, they should have coverage in the same manner where someone was charged."

Half cop, half wolf: WolfCop is a full-blown hit

WolfCop will hit silver screens across Canada beginning in little more than a month, though the Saskatchewan-made action-comedy-horror film might also bite its way into theatres all over the world.

Shot recently in Regina and Moose Jaw, the movie follows the misadventures of unsuspecting hero Lou Garou, an alcoholic cop-turned-werewolf.

Toronto-based Raven Banner Entertainment has acquired WolfCop's international distribution rights and will show the film at the Cannes Film Festival in France.

Scheduled from May 14 to 25, Cannes is one of the world's most prestigious annual film festivals. Raven Banner representatives will seek opportunities there to screen the movie worldwide.

"People have been requesting it in places like England, France and even in Japan," writer and director Lowell Dean told Metro on Tuesday.

"It's exciting, and we hope that it's the kind of movie that transcends languages."

Other than the possible international debut, WolfCop has gained momentum on social media.

The film's trailer was released on YouTube last Friday and has close to 144,000 views in only five days.

WolfCop's creators also recently launched a crowdfunding campaign through Indiegogo to produce action figures to accompany the film. The campaign reached its $10,000 goal within a week and has continued raising funds. The money will go toward production of a graphic novel trilogy.

The Indiegogo campaign will run until May 18.

The film will begin screenings at Cineplex theatres in early June.

"It feels like we're building momentum," Dean said, "and that people aren't getting sick of it, and are actually growing in excitement for it."

Last year, the film won the $1-million prize in the national CineCoup Film Accelerator competition and has been gaining a cult following ever since.

Racist comments.
League commissioner says Clippers' owner acknowledged he was the man on the tape

Issuing about the strongest rebuke that he could, NBA Commissioner Adam Silver banned Los Angeles Clippers owner Donald Sterling for life Tuesday for making racist comments in a recorded conversation, the first step toward forcing a sale of the club and permanently removing Sterling from the league.

Silver also fined Sterling $2.5 million US.

Sterling, the league's longest-tenured owner and someone with an estimated net worth of about $2 billion US, did not offer any immediate comment.

Silver said a league investigation found that Sterling was in fact the person on the audiotapes that were released over the weekend.

Sterling still owns the team, but going forward he is immediately barred from attending any NBA games or practices, being present at any Clippers office or facility and participating in any business or player personnel decisions involving the team.

Canadian pushes for husband's release from Egyptian jail

Deteriorating health. Former Morsi aide has been held prisoner for more than 300 days

Sarah Attia, wife of Al-Qazzaz.
ADRIAN WYLDSS/THE CANADIAN PRESS

A Canadian woman is pleading for federal help to convince Egypt to release her husband from captivity in a Cairo jail.

Sarah Attia says the health of her husband, Khaled Al-Qazzaz, is deteriorating.

Attia says she's growing more worried about his fate after word this week that more than 680 people with ties to ousted president Mohammed Morsi were added to a list of those facing death sentences.

Al-Qazzaz is a former aide to Morsi and a Canadian permanent resident.

He was arrested along with Morsi and eight other presidential aides early in July of last year when the Egyptian military removed Morsi from office.

While Al-Qazzaz has yet to be charged with any offence, Monday marked 300 days since his arrest.

Attia, who was born in Canada, was scheduled to meet Tuesday with Mississauga MP Stella Ambler.

Attia and Al-Qazzaz have four children ranging in age from one-and-a-half to eight years old. The two met while studying at the University of Toronto and moved to Egypt in 2005 to launch an educational project.

Al-Qazzaz campaigned for Morsi following the 2011 Egyptian uprising and was later appointed the former president's secretary on foreign relations.

"There is an increased concern that, any moment now, Khaled may witness trumped-up charges and, like others, face a death sentence as well," Attia told an Ottawa news conference.

She said she's aware that Foreign Affairs Minister John Baird recently raised Al-Qazzaz's case with the new Egyptian regime, but has no details of the discussions.

A BRAVE NEW EARTH

Why go to Mars? Futurists say the better question is: Why not?

ROBSON FLETCHER
robson.fletcher@metronews.ca

Peering into the coming decades, Glen Hiemstra has little doubt that humans will one day walk on Mars.

"It's a question of inevitability more than a question of feasibility," the Seattle-based author, consultant and founder of Futurist.com told Metro. "We will eventually go there."

While Hiemstra described the goal of the Mars One project to land settlers on the Red Planet in 2025 as "very ambitious," he also believes the timeline isn't all that far off.

"In my opinion, optimistically, it's the 2030s, not the 2020s," he said. "Realistically, it's probably the 2040s, 2050s before we've really assembled everything that we need."

Len Rosen, the Toronto-based author of 21st Century Tech Blog, foresees a similar timeframe for humanity's first footprints on Martian soil.

"The most optimistic people think in the 2030s — somewhere in that decade," said the 65-year-old Rosen. "I'm hoping I'll be alive to see it."

Questions of how aside, both Rosen and Hiemstra had similar answers when asked the bigger question: Why should we go to Mars?

Neither thought it likely that, in the immediate future at least, humans would need another planet to escape some calamity on Earth. Rather, they said, it's more a matter of satisfying our natural desire to explore.

"Curiosity is a huge part of our human nature," Rosen said. "Why do you climb a mountain to the top? You're not doing it because you feel you need to find something at the top of the mountain, other than the satisfaction."

Hiemstra said there is a certain "lifeboat aspect to settling somewhere else," adding that humanity will need another planet at some point in the distant, distant future, but for now that's not the main driver to send people to Mars.

"I think it's really driven more by the exploratory impulse," he said.

That impulse has been behind many past human achievements, Rosen noted.

"What drove us to learn how to build aircraft?" he said. "At the time I don't think anybody thought we needed to do it, but we did it. And now, what would be our world without air transport?"

WELCOME THE RED PL

A human expedition to Mars is proposed within the next 15 years. Over the next three days, Metro will take you on a pre-flight trip to show you how we'll get there, who might be first to go, and what it might be like when they arrive in this new frontier.

Spacecraft propulsion *of the past, present and future ...*

Faster and faster. The roughly seven-month trip to Mars is seen as one of the major challenges in sending people to the Red Planet.

Such a long journey will take a toll on astronauts, both in terms of exposure to high levels of space radiation and the long-term effects of microgravity on the human body. But scientists are researching all sorts of different ways to speed up spacecraft and cut down on the travel time. Here are some of the propulsion methods being considered:

Liquid-fuelled rockets

This is the type of propulsion that has been sending rockets off of the Earth's surface since the 1950s. It remains the most feasible and readily available method of powering spacecraft, although the challenge for interplanetary travel (rather than just putting craft in orbit) is that it requires both fuel and oxygen — and that can become burdensome to carry, as oxygen accounts for most of the mass in typical propellant combinations.

Ion/plasma thrusters

This approach to propulsion uses electric forces to hurl tiny charged particles at high speeds. Many satellites already use this technology to help stabilize their orbits. These thrusters have been eyed for extremely long-distance space travel, as they can provide small but continuous acceleration for months, even years. But a former NASA astronaut is working on a "Variable Specific Impulse Magnetoplasma Rocket" (VASIMR) he believes could one day reach Mars in just 40 days.

Nuclear fission

Splitting atoms to derive energy is an attractive option because a tiny amount of nuclear fuel can deliver an enormous amount of propulsion. The main challenge lies in safely controlling the fission reaction, as you don't want a meltdown in space. Nevertheless, NASA is working on a "Fission Fragment Rocket Engine" that it believes could provide "significant thrust" using "small amounts of readily available, energy dense, long lasting fuel."

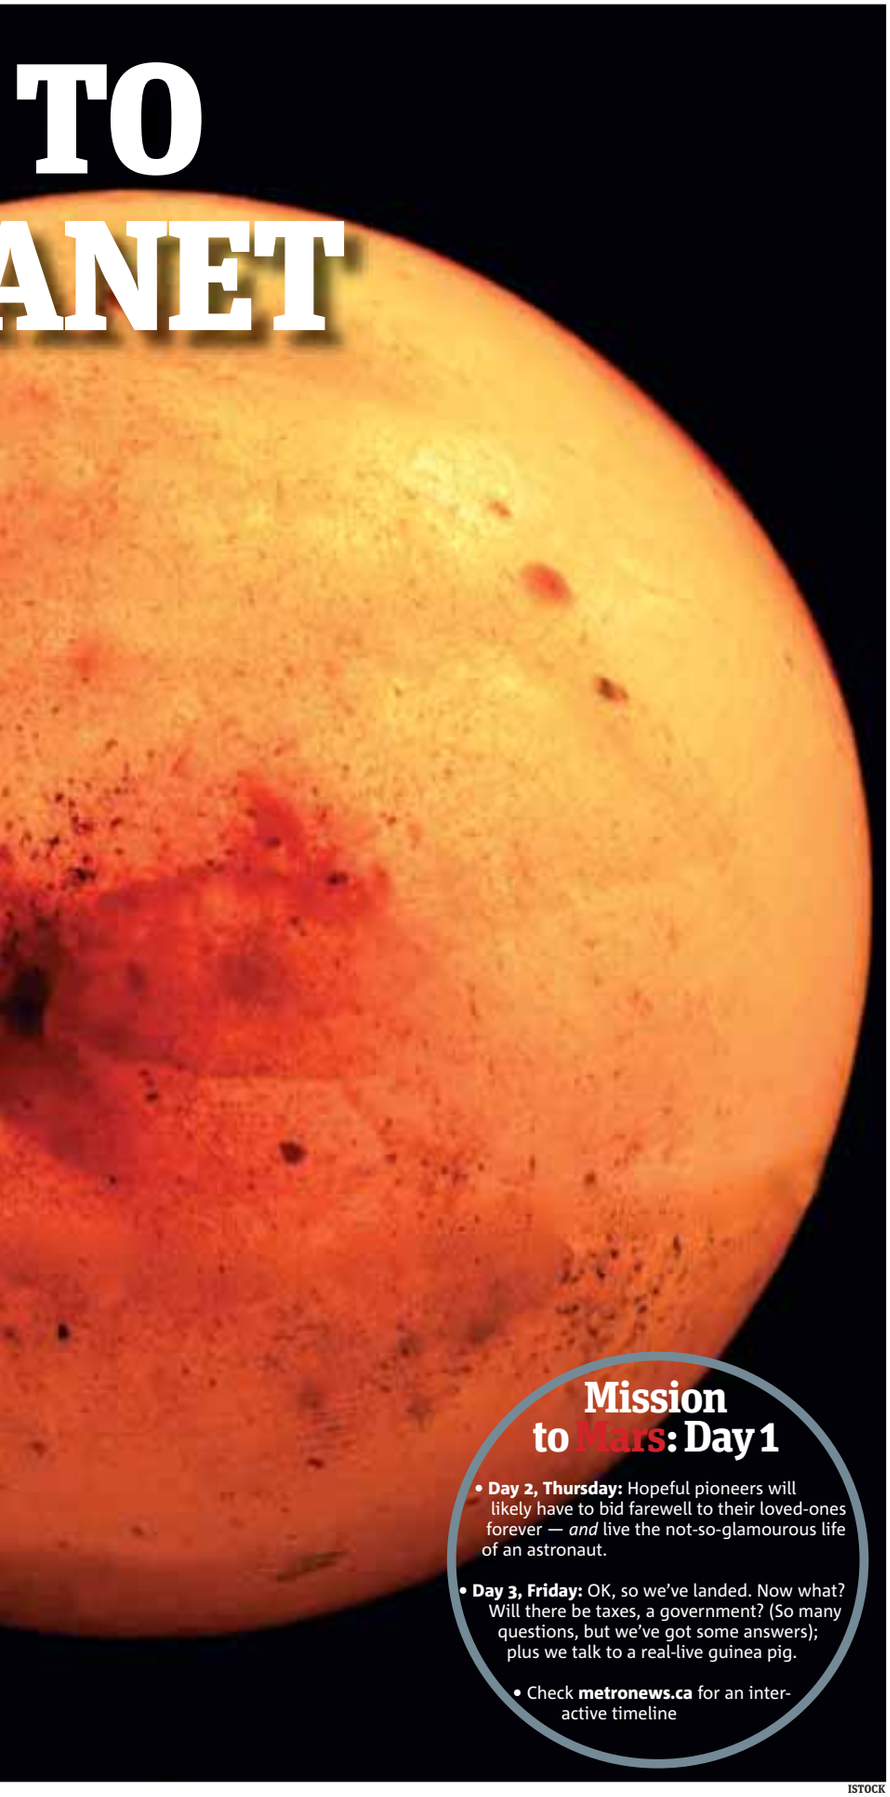
Nuclear fusion

This process involves the smashing of atoms together rather than splitting them apart, but it is similarly attractive because it harnesses massive amounts of energy from small amounts of fuel. A deuterium-tritium fuel pellet the size of a grain of sand could deliver as much propulsion as a gallon of liquid rocket fuel from a "Fusion Drive Rocket" under development by NASA and the University of Washington.

Anti matter engine

Anti matter engines are largely the stuff of science fiction, but the NASA Institute for Advanced Concepts is funding a team of researchers who are looking into the possibility of such technology. The idea is to collide matter with antimatter, resulting in a complete annihilation of mass, all of which is converted to energy. As NASA writes on its website: "While tons of chemical fuel are needed to propel a human mission to Mars, just tens of milligrams of antimatter will do."

TO ANET



Mission to Mars: Day 1

- **Day 2, Thursday:** Hopeful pioneers will likely have to bid farewell to their loved-ones forever — *and* live the not-so-glamourous life of an astronaut.
- **Day 3, Friday:** OK, so we've landed. Now what? Will there be taxes, a government? (So many questions, but we've got some answers); plus we talk to a real-live guinea pig.
- Check **metronews.ca** for an interactive timeline

ISTOCK

Success rate climbing with successive missions

Historically, more missions to Mars have failed than succeeded, but the success rate is climbing as technology improves and new missions build on the lessons of previous ones.

NASA, itself, has seen a string of recent successes, from the Spirit and Opportunity rovers in 2003, to the Mars Reconnaissance Orbiter in 2007, to the famous Curiosity rover that landed in 2012 and has been sending back high-definition imagery ever since.

NASA's next major mission, named InSight, is set to launch in March 2016 with the goal of landing a robotic drill on the Red Planet that will probe five metres into Martian soil.

Working on the robot is Catherine Johnson, a professor of planetary geophysics at the University of British Columbia, who said the tricky task of safely placing a delicate lander on the surface of Mars is becoming easier in one sense, but harder in another.

"One of the things that is becoming more and more challenging — in a good way — is that we have more and more information about the surface of Mars now, at higher and higher resolution," she said.

"So our criteria for what is a safe landing site gets stricter and stricter."

But even with a perfectly calculated trajectory and an ideal location to land, Johnson said there's one curveball Mars can still throw at you — the weather.

"A planet with an atmosphere, even if it's only a thin atmosphere like on Mars, that atmosphere can be quite variable," she said. "You never know exactly what's going to be happening the day you land."

ROBSON FLETCHER/METRO

Success and failures

In a "historical log" of 41 missions (not all of them landing missions) undertaken by various countries since 1960, NASA counts:

- **23** as having failed
- **16** as having succeeded
- **2** as "success/failure" for partially achieving their goals

An artist's conception of the stationary NASA Mars lander known as InSight, set to launch in March 2016 with the goal of drilling into the interior of Mars.

COURTESY NASA/JPL-CALTECH

Journey to Mars

Hundreds of millions of kilometres on a slingshot-trip around the sun

A depiction of how a spacecraft would go from Earth to Mars using a Hohmann transfer orbit.

IMAGE COURTESY GEORGIA TECH SATELLITE COMMUNICATIONS AND NAVIGATION COURSE

The trip to Mars is a long one.

Next to Venus, the Red Planet is the second closest to Earth, but the direct distance from here to there is still measured in the tens of millions — sometimes hundreds of millions — of kilometres.

That's because, as Earth and Mars each make their way around the sun, the distance between the two terrestrial planets varies widely.

At its closest, Mars can be about 55 million kilometres away. At its furthest, it's more than 400 million kilometres away. Earth has the inside track around the sun, orbiting every 365 days, while the Mars year is longer — roughly 687 days.

The difference between their orbital periods means that Earth "laps" Mars about once every 26 months.

These moments present an ideal launch window for spacecraft, although even then the journey is not a direct A-to-B path.

A typical trip to Mars follows what's called a "Hohmann transfer orbit," in which a spacecraft leaves Earth on one side of the sun, slingshots around the sun, and meets up with Mars on the far side of the sun from where it began. The entire journey spans hundreds of millions of kilometres and takes about seven months.

This is the route that Mars One plans to use.

According to its ambitious schedule, the non-profit foundation aims to launch unmanned spacecraft carrying equipment and robots to the Red Planet in 2018, 2020, and 2022, and then send the first crew of human settlers — on a one-way trip — in 2024. ROBSON FLETCHER/METRO

Who on earth would take a one-way trip to Mars? Find out in Day 2 of Mission to Mars

Italian court. Judge says Knox delivered 'mortal blow' in 2007 murder

The Italian appeals court that reinstated the conviction against Amanda Knox in her British roommate's 2007 murder said in a lengthy reasoning made public Tuesday that Knox herself delivered the fatal blow out of a desire to "overpower and humiliate" the victim.

Presiding Judge Alessandro Nencini concluded in a 337-page document that the evidence "inevitably leads to the upholding of the criminal responsibility" against Knox and her former Italian boyfriend Raffaele Sollecito for the murder of 21-year-old Meredith Kercher in a hillside villa occupied by students in the university town of Perugia.

The judge said the nature of Kercher's wounds, which he said were inflicted by two knives, and the absence of defensive wounds indicated multiple aggressors were to blame, also including Rudy Hermann Guede, an Ivorian man convicted separately and serving a 16-year sentence.

Nencini presided over the Florence-based panel that reinstated the first trial guilty verdicts against Knox and Sollecito in January, handing Knox a 28 1/2 year sentence including the additional conviction on a slander charge for wrongly accusing a Congolese bar owner. Sollecito faces 25 years.

The release of the court's reasoning opens the verdict to an appeal back to the supreme Court of Cassation.

The University of Washington student has been in the United States since 2011, when her earlier conviction was overturned. Knox, 26, has vowed to fight the reinstated conviction, saying she would "never go willingly" to Italy to face her judicial fate.

THE ASSOCIATED PRESS

The decision

Nencini's reasoning assigned the role of each assailant.

- Sollecito, now 30, used a small knife that caused a wound on Kercher's neck and also was used to remove her bra, the judge wrote, while Guede restrained and sexually assaulted the victim. Knox "delivered the only mortal blow," with a kitchen knife, the judge wrote.

Ukrainian activists seek referendum

Pro-Russian activists storm an administration building in the centre of Luhansk, Ukraine, one of the largest cities in Ukraine's troubled east on Tuesday as demonstrators demand greater autonomy for Ukraine's regions. ALEXANDER ZEMLIANICHENKO/THE ASSOCIATED PRESS

Eastern Ukraine. Pro-Russian insurgents have been holding European military observers since Friday in Slovyansk

Protesters demanding more power for Ukraine's regions stormed the government building in Luhansk with baseball bats Tuesday, seizing control of a key site in one of the largest cities in Ukraine's troubled east.

The move further raises tensions in the east, where pro-Russia militias have seized city halls, police stations and other government buildings in at least 10 cities and towns.

In Slovyansk, the insurgents have been holding seven European military observers since Friday. Russian President Vladimir Putin said late Tuesday that he hoped they will be released soon.

The demonstrators who overran the building in Luhansk are seeking — at the very least — a referendum on granting greater authority to Ukraine's regions.

Eastern Ukraine, which has a large Russian-speaking population, was the heartland of support for Viktor Yanukovych, the ousted president who fled to Russia in February. The government that replaced him in Kyiv has resisted those demands so far, fearing they could lead to a breakup of the country or mean that more regions could join Russia, as Crimea did.

The storming came as 1,000 demonstrators gathered in front of the building. About 150 people, some masked and wielding baseball bats, broke out of the crowd and charged into the building, meeting no resistance. Later protesters formed a corridor to allow police inside the building to leave.

Luhansk, a city of about 450,000, is just 25 kilometres west of the border with Russia.

Regional autonomy is a core issue in the unrest in eastern Ukraine, where insurgents fear that the government that took power after Yanukovych fled will suppress the Russian-speaking population.

Ukrainian elections

Monitoring the vote

The Harper government has hired two agencies with relatively little experience in elections monitoring to organize 338 bilateral, short-term Canadian observers for next month's Ukrainian presidential vote.

The government has hired the Forum of Federations and CUSO International to replace its longtime Ukraine election partner, the non-governmental organization Canadem.

Colorado

BYOW: Like BYOB, but with weed

Saying it's bring-your-own-weed, the Colorado Symphony Orchestra will play a series of fundraising concerts sponsored by the state's growing pot industry.

In a statement Tuesday, symphony CEO Jerome Kern says they're part of efforts to reach a broader audience.

Listeners are encouraged to bring their own marijuana to smoke or eat. Smoking will be allowed at the private venues where the first two 21-and-up concerts will be held. Organizers say they will follow the rules at the final show at the publicly owned Red Rocks Amphitheater, where smoking is banned.

Mexico City

Vigilante kills robbers on bus

Mexico City officials said Tuesday an unidentified man disarmed a thief trying to rob passengers aboard a bus, then shot him and another thief to death before fleeing.

The Mexico City officials said the bodies of two men were found at the scene late Monday, as were two pistols — one of them a toy.

Officials quoted witnesses saying the two men were allegedly robbing passengers at gunpoint when a bus rider wrestled a gun away from one thief, shot him and the accomplice. He has since been labelled "the anonymous avenger," or "Vengador Anonimo" in local media.

Feds constantly ask telecoms for private info

Report. The privacy commissioner's office reveals government asks for information 1.2M times every year

The federal government asks Canadian telecom companies for private customer information about 1.2 million times each year, documents released Tuesday by the federal privacy commissioner's office show.

It is unclear how many of those requests are made without a warrant. But figures provided to the office in late 2011 show wireless telecom companies complied with the government's requests for customer data at least 784,756 times.

However, the actual total is likely even greater, since only three of nine telecom companies told the commissioner's office how many times they granted the government's requests for customer data. The numbers came to light Tuesday as Canada's acting privacy commissioner revealed that telecom companies have refused to disclose how often they release confidential customer information to the federal government without a warrant.

Chantal Bernier THE CANADIAN PRESS

Chantal Bernier, the interim privacy commissioner, said her office has repeatedly asked telecom companies to disclose statistics and the scope of warrantless disclosure of data, but to no avail.

"I'm not disputing that there are times when there is no time to get a warrant — life is in danger," Bernier said.

"What we would like is for those warrantless disclosures to simply be represented in statistics so that Canadians have an idea of the scope of the phenomenon."

Bernier said the companies have only provided her office with aggregate data, which shows how many times the telecom industry as a whole gives the government customer information without a warrant.

In 2011, the privacy commissioner's office asked 12 telecom companies for information about their customer-disclosure data. The Canadian Wireless Telecommunications Association, which represents the industry, replied with aggregate data from nine of the 12 companies.

Mercedes-Benz recalls 284,000+ C-Class cars

A Mercedes C-Class C350 sits on display at the New York International Auto Show in April 2011, in New York City. Mercedes-Benz is recalling more than 284,000 C-Class cars in the U.S. and Canada because the rear lights can fail. The recall affects some C300, C350 and C63 AMG cars from the 2008 through 2011 model years. The problem affects nearly 253,000 cars in the U.S. and another 31,000 in Canada. BY GEORGE! AT LAST, A UNION FORGED

JUST SAYIN'

Paul Sullivan
metronews.ca

I'm sure I'm not the only guy who ever wished he could be George Clooney, if only for a day.

A winning combination of intelligence, talent, wit, savoir faire, je ne sais quoi and all those other untranslatable French phrases, George tops it all off with matinee-idol good looks.

Not surprising. He's a matinee idol, duh.

Which is no small distinction. Matinee idols are a dying breed. All the other guys on the cover of GQ look alike and are called Hemsworth. George is the epitome of class at a time when class is 40 per cent off at the outlet mall. Who wouldn't want to be George?

Until now, George was also the world's most eligible bachelor. Apparently — I wouldn't know — that's tough. When the women of the world are throwing themselves at your feet, it can be a challenge, or so I hear. George handled the "too many women problem" by doing his best to date them all. And after a brief matrimonial experiment in the early '90s, he also tried to live with them all, one at a time, for two- to three-year stretches.

A selfless quest, if doomed to failure. There's just not enough George to go around. And, truth be told, at 53, he's not getting any younger. You could see it in Gravity. Sandra Bullock was the undisputed star and George was relegated to supporting role status as the kindly sidekick, sort of Buzz Lightyear with crinkles. Not wrinkles. George will never have wrinkles.

The signs are clear. The man who bet Michelle Pfeiffer $100,000 that he'd never get married again is ready to settle down. All those cocktail waitresses, supermodels and female wrestlers were OK when he was dating the entire female gender, but now he has to pick one.

And so he's focused that formidable charm on the world's smartest and most beautiful woman, who, in case you're wondering, is 36-year-old Amal Alamuddin. It's hard to believe she is just one woman. She tops the list of the 21 Hottest Barristers in London, was educated at Oxford, specializes in international law, speaks three languages, advises the Secretary General of the UN on human rights in Syria, represented ex-Ukrainian Prime Minister Yulia Tymoshenko and helped Wikileaks founder Julian Assange resist extradition to Sweden.

I imagine it's hard to pull the wool over Ms. Alamuddin's eyes, but when the wolf mounting the charm offensive is George Clooney, what can you do? You sigh, succumb, and go to meet mom. Who, by the way, approves of this prodigious combination of beauty and brains.

Of course, this is real life, not Hollywood. The union of the world's most eligible bachelor and the paragon of global jurisprudence does not, at first blush, look like a recipe for Happily Ever After. Amal better hope George's attempt to mate, er, date the planet is over, and George better hope he doesn't end up before a world tribunal on matrimonial war crimes. Still, today, it's all about congratulations and the triumph of class over crass.

Science experimantis

Newcastle University scientists research vision by outfitting a praying mantis with 3D glasses.
MIKE URWIN/NEWCASTLE UNIVERSITY

Q&A

"It's a test for their eyesight"

VIVEK NITYANANDA
Research associate at Newcastle University's Institute of Neuroscience

A praying mantis has been outfitted with the world's smallest pair of 3D glasses as part of an experiment to understand the insect's vision. Scientists from Newcastle University used beeswax to affix the five-millimetre-wide shades on the bug's head.

Here's what researcher Vivek Nityanada had to say about the experiment:

What inspired you to put 3D glasses on a bug?
We wanted to find out how three-dimensional vision has evolved. Like humans, praying mantises have 3D vision, or stereopsis. They are the only insects with such sight.

How did your mantis take to its new eyewear?
It tried to take them off at first, but eventually got pretty comfortable with them and went about its usual mantis business.

Do the glasses work?
So far, our results have been mixed. It's promising but we haven't nailed it down yet.

Maybe the insect will prefer the glasses, as a super-enhancement to its vision. (Laughs) It doesn't really change its eyesight for the better; we're just fooling it into misjudging depth. But the glasses do make them seem more sophisticated, and they definitely look weirder than they already are.

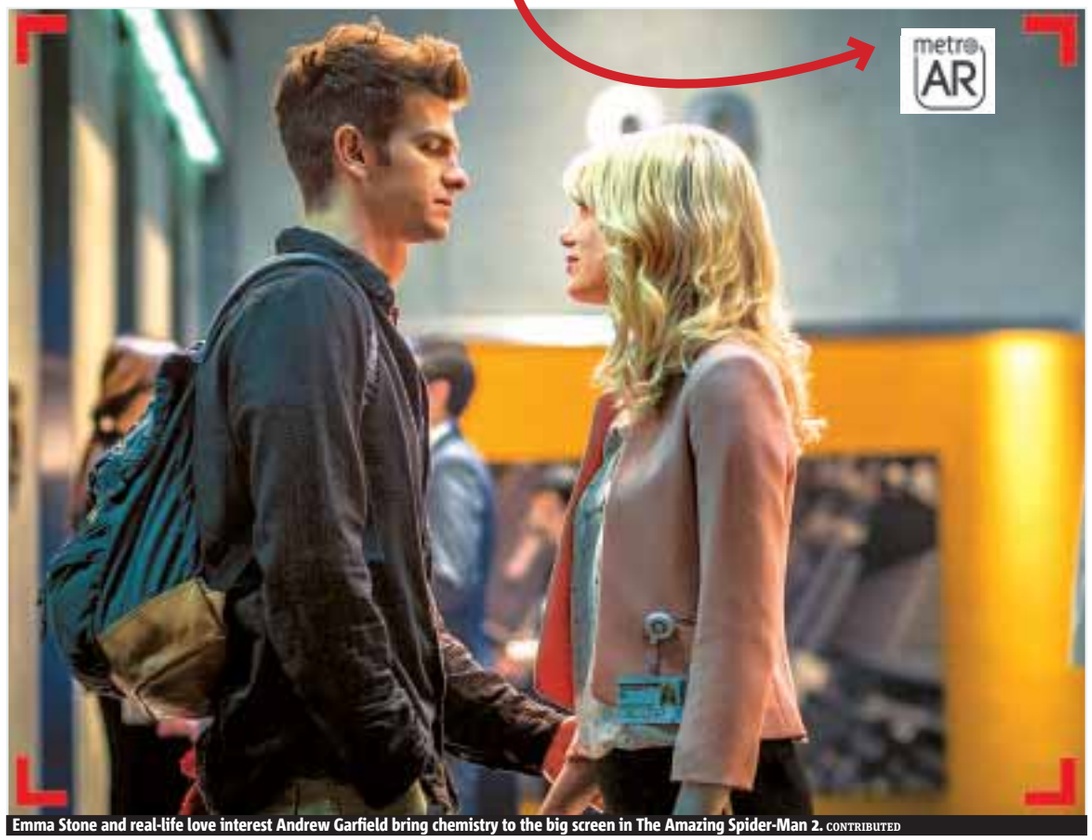
Stone shines in every role

From The Help to Spider-Man. Whether the role demands Lucille-Ball-style screwball comedy, fiery rage and indignation or sizzling chemistry, Emma thrives

IN FOCUS
Richard Crouse
scene@metronews.ca



Emma Stone and real-life love interest Andrew Garfield bring chemistry to the big screen in The Amazing Spider-Man 2. CONTRIBUTED

The Spider-Man movies don't skimp on the stuff that puts the "super" into superhero movies. There's web-slinging shenanigans and wild bad guys galore, but The Amazing Spider-Man 2 director Marc Webb calls the relationship between Spidey and girlfriend Gwen Stacy, "the engine of the movie."

The chemistry the real-life couple brings to the screen is undeniable, but it almost didn't get a chance to blossom. Before Stone landed the role of the brainiac love interest, Mia Wasikowska, Imogen Poots, Emma Roberts and even Lindsay Lohan were considered.

Stone won some of the best reviews of her career playing Gwen in The Amazing Spider-Man — Peter Travers said she, "just jumps to life on screen" — in a role that gave her the biggest hit of her career to date.

Smaller roles in Superbad and Zombieland hinted at her ability to be funny and hold the screen, but in 2010's Easy A she turned a corner into full-on Lucille Ball mode, mixing pratfalls with wit while pulling faces and cracking jokes. Smart and funny, she's the film's centrepiece.

The movie begins with the voice over, "The rumours of my promiscuity have been greatly exaggerated." It's the voice of Olive (Stone), a clean-cut high school senior who tells a little white lie about losing her virginity. As soon as the gossip mill gets a hold of the info, however, her life takes a parallel course to the heroine of the book she is studying in English class — The Scarlet Letter.

Stone is laugh-out-loud funny in Easy A, but her breakout film was a serious drama.

In The Help, she plays Jackson, Miss. native "Skeeter" Phelan who comes home from four years at school to discover the woman who raised her, a maid named Constantine (Cicely Tyson), is no longer employed by her family. Her mother says she quit, but Skeeter has doubts. With the help of a courageous group of housekeepers she tells the real story of the life of the maids, writing a book called The Help.

The Flick Filosopher called her performance, "on fire with indignation and rage," and she moved from The Help to a variety of roles, including playing a femme fatale in Gangster Squad opposite Ryan Gosling and Josh Brolin, and lending her trademark raspy voice to cave girl Eep in the animated hit The Croods.

The 25-year-old actress is living her childhood dream of being an actress but says if performing hadn't worked out, she would have been a journalist, "because (investigating people's lives is) pretty much what an actor does. And imagine getting to interview people like me," she laughs. "It can't get much better than that."

OUR TAKE ON THE WORLD OF CELEBRITIES

Craig Ferguson

Ferguson gives up late-night spot

In the latest of a series of late-night comedy shake-ups, Craig Ferguson, host of CBS' The Late Late Show since 2005, has announced that he is leaving the show.

This is the most recent domino to fall in the late-night line-up. David Letterman announced his retirement from Ferguson's lead-in, The Late Show, earlier in April. CBS quickly named Stephen Colbert of The Colbert Report as his successor.

The Word

Donald Sterling's girlfriend, V. Stiviano, reads Metro?

THE WORD
Dorothy Robinson
scene@metronews.ca

V. STIVIANO/INSTAGRAM

After the audio tapes of Clippers' owner Donald Sterling spewing racial slurs hit, his alleged girlfriend and leaker of those tapes, V. Stiviano, made her Instagram account public for the world to see. And if you haven't looked at it, you should. It is truly weird and obnoxious — she overuses hashtags more than a 13-year-old girl.

After some sleuthing, we stumbled upon this shot of her reading a Metro with the caption, "I'm searching for love in the classified section!"

We at Metro want you to know we don't support people like Donald Sterling advertising in our classified section. She must have found him some other way. Maybe racistsugardaddyforme.com?

Kanye West and Kim Kardashian ALL PHOTOS GETTY IMAGES

Kim and Kanye lockdown their love this week

It is being reported that Kim Kardashian and Kanye West will be wed in a very small, private ceremony with a justice of the peace in Los Angeles this week.

Yes, yes, yes — the lavish Parisian celebration is still taking place, but before that occurs, their lawyers are recommending they be hitched in a civil ceremony to avoid going through an international bureaucratic nightmare. After they say "I do" in court, they will then fly to Paris to plan their wedding.

Get your suits and dresses dry cleaned now — it's reported they will be married on May 24.

Outer Banks offers different strokes for different folks

More than just a golf destination. Once you've tired of swinging the sticks, there's still plenty more to take in on a trip to North Carolina's rugged coastline

BRIAN KENDALL
canadiangolftraveller.com

Nags Head Golf Links is cruelly exposed to the turbulent waters of the Atlantic and offers a challenging 18-hole game. ALL PHOTOS: CONTRIBUTED/PLAYOBXGOLF.COM

Even for golfers determined to spend every possible moment swinging the sticks, the Outer Banks of North Carolina offer other attractions too essential to ignore.

Foremost among them is the Wright Brothers National Memorial, set on the now hallowed ground near the beach town of Kitty Hawk where Wilbur and Orville Wright launched the first powered air flight in 1903.

A stone pillar marks the precise spot of that epochal liftoff, and the site's prize attraction is a full-scale replica of the Wright Flyer, their first primitive aircraft. The Wright brothers are credited with making famous this sun-drenched 320-kilometre-long chain of barrier islands, just off the coast of North Carolina and a small stretch of Virginia.

Today, the coastline's white sand beaches, lighthouses, oyster houses, quaint shingle-sided inns and outstanding golf courses are year-round attractions — although peak season runs from May through September. Capricious winds off the turbulent waters offshore, known as the Graveyard of the Atlantic, frequently bedevil golfers at the popular oceanfront courses of OBX, as tourism marketers have branded the Outer Banks.

Most cruelly exposed to the elements is Nags Head Golf Links, a Scottish-style design where several holes play alongside Roanoke Sound. Golf Digest called architect Bob Moore's layout "the longest 6,126 yards you'll ever play."

Another seaside beauty is Currituck Club, a dramatic Rees Jones design that sweeps across 600 acres of dunes, wetlands, maritime forests and sound seascapes.

High seas swept ashore another of the coast's unique attractions. Wild horses, descendants of Spanish mustangs that survived 16th-century shipwrecks, freely roam the dunes of Swan Beach, North Swan Beach and Carova Beach. Jeep tours offered from the nearby town of Corolla provide a close-up look at the tenacious survivors of a herd that once ranged throughout the barrier islands.

Overnight camping trips see you kitted out in everything you need, spending the night on the open lava fields. Check out VisitIceland.com.

DOUG WALLACE/METRO

Strike out on a springtime trip to Boston

From Fenway to Fort Point. There's plenty to see and do in one of the most historic cities in the United States

ON THE MOVE
Loren Christie
life@metronews.ca

In the late '90s, I spent three summers in and out of Boston working as a tour guide. This past weekend, I went back to see what's changed in one of America's most historic cities.

After almost 20 years, the Big Dig is over and the snarling traffic is gone. This massive construction project of underground roadways beneath the city included the dismantling of an elevated highway that cut through the downtown. In its place urban parks have sprung up as part of the extensive Rose Kennedy Greenway, which has blazed a two-kilometre swath of green through the city core.

Iconic Fenway Park. ISTOCK

The project has united pedestrians and drawn them to the newly developed waterfront area with food trucks, a carousel and more attractions.

Iconic Fenway Park, home to the city's beloved Red Sox baseball team, used to be on the edge of the tourist trail. The charming Commonwealth Hotel changed that by coming into the area 10 years ago and attracting tourists into neighbouring Kenmore Square. The revitalization of the square with hip restaurants and bars like Eastern Standard have made a pre- or post-game meal an experience, and according to my taxi driver Paul, "turned Kenmore into a paah-ty place."

Fort Point is an historic warehouse district that has been transformed into a collection of artists' workshops, businesses and restaurants. My former employer's headquarters on Congress Street, in the heart of the Fort Point area, is still there. However, instead of a lonely Dunkin' Donuts as the only potential lunch spot, today's Congress Street includes a two-block stretch of modern restaurants that were hopping when I strolled by. My meal of white sausage with hazelnut pesto and sorrels, a perfectly seasoned flank steak with chimichurri sauce and a side of golden beets and cauliflower at buzzy Tavern Road was perfect.

Bostonians have always burst with civic pride, but following last year's Boston Marathon bombings, you get the feeling that it goes beyond the love of hometown sports teams and historic buildings. It seems that every citizen has your back and each other's. After brunch at Towne Stove & Spirits on Boylston Street, blocks from the marathon finish line, I wandered up to Engine 33/Ladder 15 fire hall, which has been in operation since 1888. Taking a suggestion from a local we met the day before, I bought a Boston Fire Department T-shirt as a souvenir. The $20 cost goes to a fund to support the families of two firefighters who recently died in the line of duty.

VALUE-ADDED SPRING LOOKS

SHAKE UP YOUR STYLE AT SEARS OUTLET STORE

You don't have to buy a whole new wardrobe to be fashion forward. Sometimes it's just the little pops of spring's favourite new shades or coolest new trends that make your go-to favourites from last year this season's hottest looks.

"Updating your wardrobe with a piece here and there is the easiest and most affordable way to give your style a shakeup," says Charlene Bristow, Regina's Sears Outlet Store sales manager.

This season is sizzling with pretty pinks, soft pastels, bright florals and bold black-and-white fashion pieces to mix and match. Dress up simple looks with exciting new accessories — chunky necklaces, large hoop earrings, colourful scarves and oversize sunglasses are just a few of the great pieces that will take spring style from ordinary to outstanding.

Affordable fashion is always in style.

"At Sears Outlet Store, we offer a large selection of stylish dresses in a variety of styles from casual to formal for just $9.72 or less," Bristow says.

Other trend items for this spring include dressy shorts, wide crop pants, crisp white shirts, sports sandals and more.

"We get new arrivals every day. Check out our great selection to reinvent your wardrobe — and yourself."

Earthy and buttery flavours mingle

Porcini-Dusted Fish with Brown Butter Sauce. Use dry mushrooms to create a unique taste

FLASH FOOD

From your fridge to your table in 30 minutes or less

DINNER EXPRESS
Emily Richards
food@metronews.ca

Dried mushrooms offer up a delicious woodsy flavour to fish and the brown butter sauce makes the experience over the top in taste. You will find dried mushrooms in the produce section of the grocery store for this Porcini-Dusted Fish with Brown Butter Sauce recipe.

These fillets are a generous 6 oz (175 g) portions, a bit larger than the 5 oz (150 g) portions sold in stores. Buying larger fillets and cutting them at home gives you that advantage to enjoy a little more fish. Or you can also serve up six 4 oz (125 g) portions with this same recipe.

Fish

1. In a clean coffee grinder, grind dried mushrooms to a fine powder. Place in small bowl and add coriander; set aside.

2. Using sharp knife, cut fish into 4 equal portions if fillets are large. Coat each piece with mushroom mixture and place in baking dish. (Make-ahead: Cover and refrigerate for up to 4 hours.).

3. Sprinkle fish with salt. In a large nonstick skillet, melt 2 tbsp (25 ml) of the butter over medium-high heat until just starting to brown. Add fish, skin side down, if any and cook for 3 minutes. Transfer to parchment paper lined baking sheet and roast in 425 F (220 C) oven for about 10 minutes or until fish is opaque and flakes easily when tested.

Spinach Skillet Side

A gingery garlic zing matches nicely with spinach to serve up as a side dish for many meals. The added kick of hot pepper sauce adds an almost mellow balance to the dish.

For an added kick, add more hot pepper sauce before serving this side dish.

To make ahead: Cook up the spinach and then let it cool and refrigerate for up to 1 day. Simply warm it up in a skillet or microwave the next day.

1. In a large non-stick skillet, heat the canola oil over medium heat and cook garlic and ginger, stirring for about 2 minutes or until softened.

2. Add the baby spinach and hot pepper sauce and cook, stirring for about 5 minutes or until spinach is wilted.

This recipe serves four. EMILY RICHARDS

Ingredients

Fish
- 1 pkg (14 g) dried wild mushrooms
- 1 tbsp (15 ml) finely chopped fresh coriander
- 1 1/2 lbs (750 g) fresh fish such as pickerel, cod or trout
- 1/2 tsp (2 ml) kosher salt
- 3 tbsp (45 ml) butter

Spinach Skillet Side
- 1 tbsp (15 ml) canola oil
- 2 cloves garlic, minced
- 1 tbsp (15 ml) minced fresh ginger
- 1 bag (8 oz/227 g) baby spinach leaves
- 1/2 tsp (2 ml) hot pepper sauce (optional)

Fresh approach to baked haddock

If you're contemplating a fresh approach to breaded and baked haddock, turn to the mandoline to render a potato fit for pairing with the fish.

In any other form, potatoes would be too robust for a delicate baked fish. But shaved paper thin, then wrapped around the fish, the potato slices become a deliciously crisp edible wrapper.

Just one caution — there is a reason mandolines come with a hand guard for holding the vegetables while slicing. They are extremely sharp and it's easy to cut yourself.

1. Heat oven to 400 F. Add oil to large cast-iron skillet, then place skillet in oven to heat.

2. Meanwhile, use mandoline fitted with the thinnest slicing blade to slice the potatoes into very thin rounds. The potato rounds should be as close to paper thin as possible. Set aside.

3. In bowl mix mustard and mayonnaise. Set aside.

4. Remove skillet from oven and carefully cover bottom of it with single layer of potato slices, overlapping edges slightly. Season the potatoes with a bit of salt, pepper and thyme.

5. Use paper towels to pat dry the haddock fillets, then brush the mustard-mayo mixture over both sides of the fish. Place the haddock over the potatoes in the skillet, then arrange a second layer of potato slices over the fish, covering it entirely. Season the potatoes with salt, pepper and thyme, then mist them with cooking spray.

6. Return skillet to the oven and bake for 14 minutes. Increase the oven to broil and cook for another 2 to 3 minutes, or until the potatoes are nicely browned. Divide the haddock into 4 pieces, being careful to leave the potatoes in place as you serve the fish. THE ASSOCIATED PRESS

Ingredients
- 1 tbsp canola or vegetable oil
- 2 medium Yukon gold potatoes
- 1 tbsp Dijon mustard
- 1 tbsp mayonnaise
- Salt and ground black pepper
- Dried thyme
- 1 1/4 lbs haddock fillets (about 2 large fillets)

Under the provisions of *The Alcohol and Gaming Regulations Act, 1997,* Notice is hereby given that Victoria's Tavern Inc. has applied to the Liquor and Gaming Authority for a Restaurant with Tavern endorsement Permit to sell alcohol in the premises known as Victoria's Tavern at 1965 Hamilton Street Regina, SK of which the following is a correct legal description:

Lot: 45 to 48
Block: 346
Plan No.: 101177513 Ext 1
1965 Hamilton Street
City of Regina, SK

Written objections to the granting of the permit may be filed with SLGA not more than two weeks from the date of publication of this notice.

Every person filing a written objection with SLGA shall state their name, address and telephone number in printed form, as well as the grounds for the objection(s). Petitions must name a contact person, state grounds and be legible. Each signatory to the petition and the contact person must provide an address and telephone number. Frivolous, vexatious or competition-based objections within the beverage alcohol industry may not be considered, and may be rejected by the Saskatchewan Liquor and Gaming Licensing Commission, who may refuse to hold a hearing.

Write to:
Saskatchewan Liquor and Gaming Authority
Box 5054
Regina, SK S4P 3M3

EXPERIENCE CULTURE, ARTS, DIVERSITY

Youth across the country are becoming increasingly important to the future of Canada.

That's why National Youth Week from May 1-7 celebrates youth and, this year, the city of Regina is focusing on diversity and connecting youth to their communities, says City of Regina community capacity building co-ordinator Bill Ursel.

"We're really excited and keen on the events going on throughout the city this year," Ursel says. "Our focus this year is to encourage youth to experience culture, arts and diversity. Another goal of this weeklong event is to encourage participation in future activities as well."

There is a plethora of community events aimed towards connecting youth with one another and the community, as well as recreation, arts and culture opportunities, Ursel says.

The Regina Sportsplex (1717 Elphinstone St.) will offer special rates for youth all week, including two-for-one drop-in basketball and free drop-in basketball clinics. For those who don't enjoy sports, there are also free drop-in hip-hop classes.

The rainbow youth centre is hosting a youth talent night May 7, and the Queen City Eastview Community Association is hosting several events.

That's just a snapshot of the events going on throughout the week.

For more information about Youth Week events, visit regina.ca.

A PLACE FOR YOUTH TO CALL THEIR OWN

CHECK OUT THE REGINA PUBLIC LIBRARY

Libraries have evolved into a casual, comfortable gathering place for our youth to hang out with their friends, read, use the computers or connect to RPL's free Wi-Fi. RPL is proud to offer youth a space to call their own.

RPL has ongoing programs, groups and clubs for youth at various locations: Homework Help with volunteer tutors helps teens with homework; Manga Club meets to discuss anime, manga, comics, video games and cosplay; Dun-E Young Artists' group meets to explore creativity, art and leadership; Truly Stellar Tuesdays includes fun activities with friends such as a Makey-Makey Studio and more.

This summer, youth with a passion for writing have an opportunity to develop their creative talents in an intensive writing workshop presented by RPL and Sage Hill Writing Experience. Youth also have a chance to submit their work to be published in a special edition chapbook. Applications are available at sagehillwriting.ca.

Over the summer, teens will want to keep reading to submit the titles of books, eBooks, audiobooks, magazines or comics they have read to win great prizes including gift cards or even a PlayStation4.

For more, visit ReginaLibrary.ca.

SUPPORTING ATHLETIC DREAMS

NOTRE DAME

For high school students striving for excellence, selecting the right school can make all the difference when it comes to realizing their dreams.

The university prep school of choice for scholar-athletes since 1920, Athol Murray College of Notre Dame has developed more elite junior, collegiate, CIS, NCAA, national, Olympic and NHL stars than any other high school in the world. With 18 athletics programs for boys and girls, the school is recognized internationally for its challenging academic program, use of classroom technology and buffet of elite and recreational sports offerings.

"Our students succeed because they feel supported," says director of admissions Britt Leeking. "They have elite coaches and exceptional teachers who believe in their athletic dreams and want to

CONTRIBUTED

prepare them for university. Notre Dame is about opening those doors."

Notre Dame provides a structured, supportive academic environment, with an average class size of 16 students, scheduled office hours for direct access to teachers and supervised evening study time.

"Students are surrounded by like-minded, motivated peers and live on campus in a healthy, fun and safe community," Leeking says.

"There's no better place to live, play and study if you're seeking a challenge."

INDIGENOUS GAMES ARE MORE THAN JUST SPORTS

In a few short months, Regina will proudly host the 2014 North American Indigenous Games, showcasing unity, sport, culture, youth, volunteerism and teamwork among indigenous people, the community and North America.

"It's more than just a series of sporting competitions," says Lachlan Madill, communications manager for the North American Indigenous Games. "It's a cultural gathering that includes events and entertainment — the biggest event in North America for indigenous people, with 4,000 athletes aged 13 to 19 participating, along with 1,000 coaches and support staff."

Athletes will compete in summer sports that range from archery and badminton, to baseball and kayaking, and more.

"We're building leadership, sportsmanship and community with the games. And we're inviting the entire community to join in the fun."

Some 3,500 volunteers are needed to

CONTRIBUTED

help make the games a success.

"We need people to help with everything from raking sand pits and giving directions to posting signs and announcing events" Madill says. "We want everyone to come out and experience the games. It's a great way for youth to meet others and celebrate indigenous groups from across the country."

Opening ceremonies will be held July 20 at Mosaic Stadium. Find out more at regina2014naig.com.

What green can mean to your team

Plant some productivity. Stopping to smell the flowers may be as important to an office worker as it is to an outdoor wanderer

SIDNEYEVE MATRIX
TalentEgg.ca

Whether you are working from home, occupy a corner office or spend your days in a cubicle, research shows a connection between office plants and creative thinking. ISTOCK

It's been a long Canadian winter, but signs of spring are everywhere — with national mood-lifting effects.

To amplify the productivity boost that comes from the seasonal change, put some flowers on your desk.

A recent study from Texas A&M University found that having flowers and greenery around positively affected employees' ability to generate ideas and problem-solve at work.

Head researcher Roger Ulrich and his team found that employees were able to generate 15 per cent more ideas and come up with a greater supply of flexible solutions to problems when they shared their workspace with flowers.

Feel-better flowers

Beyond ideation, flowers at work have a significant and positive effect on your health and well-being, say researchers.

Having fresh blooms on your desk can lower your anxiety, combat depression, reduce negative thinking, and may even have a positive impact on memory. Some studies show that surrounding yourself with indoor plants can help reduce fatigue, coughs, sore throats and other cold-related illnesses by up to 30 per cent — which translates into increased productivity, fewer sick days, and cost savings for employers.

Scientists at the University of Exeter studying the links between flowers and creativity found that adding office plants to workspaces resulted in a 47 per cent boost to staff well-being and a 45 per cent increase in their ability to be creative.

Virtual nature

Breaking up your workday for a walk outside delivers an amazing mood uplift and psychological refresh.

Likewise, studies show that exposure to simulated nature scenes can also have a positive impact on your productivity and mood. Slate has reported psychological research by Deltcho Valtchanov in which he placed participants in a virtual reality space filled with simulated trees, flowers, plants, grass and they experienced higher levels of happiness, friendliness, affection, and playfulness.

If that convinces you to swap your desktop wallpaper for images of flowers and leaves, head over to Nature Wallpaper for some stunning free downloads optimized for mobile, desktop screens, or social profiles.

Digital flora

For your digital downtime while commuting to the office, a few apps will get you in a flowery mood.

To separate daisies from daffodils and roses from rhododendrons, the FlowerPedia app has over 2,800 photos of flowers and regional information about local blooms, plus wallpapers, and the ability to share photos with friends.

To help design your home garden, the Landscaper's Companion app differentiates 26,000 shrubs, annuals, perennials and plants.

To brighten someone's day, the 1-800-Flowers app or The Mobile Florist by FTD will help you say it with flowers.

For the perfect virtual bouquet try the highly rated Flower Garden app by Snappy Touch, to plant, tend, snip, and send digital blooms to family and friends.

Blossoming at work

Gadgets aside, science provides proof of the restorative potential of nature and the mood boost that comes from a "living" work environment.

Dialling up the leafy factor of your workspace and increasing the green time in your workday is not only good for your mental health, but also contributes to more focused work performance and increased job satisfaction.

Donald Sterling

Playoff boycott was on the table for players

NBA players strongly considered boycotting playoff games if commissioner Adam Silver hadn't ruled harshly against Los Angeles Clippers owner Donald Sterling.

Players' union vice-president Roger Mason Jr. says he spoke to representatives from every playoff team about the possibility of boycotting games in solidarity against any ruling that didn't include a mandate for Sterling to sell the Clippers.

The Clippers hosted the Golden State Warriors Tuesday night.

Mason says the players are very happy with Silver's decision to ban Sterling for life while urging the NBA's board of governors to compel Sterling to sell the Clippers.

Sharks get last shot at ousting Kings

NHL playoffs. L.A. has dug itself out of 3-0 series deficit for a chance to advance past opening round

It should come as no shock that the Los Angeles Kings and San Jose Sharks are preparing for a Game 7 in their first-round series considering how tightly contested this fierce California rivalry has been over the last few years.

The surprise is how the teams got to Wednesday night's win-or-go-home game.

The Sharks were dominant early, winning the first three games and making former playoff MVP Jonathan Quick look rather pedestrian as he allowed 16 goals in those losses.

But the Kings responded to win three straight games by three goals to force the showdown in San Jose for a spot in the second round against Anaheim.

"We understand what's at stake," Sharks forward Joe Pavelski said. "There was the possibility the series was going to go to seven. We probably didn't think it was going to get there this way, but we're here now and guys will be ready to play."

The Kings are the ninth team to force a Game 7 after losing the first three games. Three of the previous eight finished the job, though the Sharks can take solace in the fact that they avoided that same collapse in 2011 when they rebounded from three straight losses to beat Detroit 3-2 at home to advance to the Western Conference finals.

Canadiens searching for power-play cure

The Canadiens power play has struggled with opponents keying in on P.K. Subban's big shot from the point. RYAN REMIORZ/THE CANADIAN PRESS

The Montreal Canadiens are wondering where their power play has gone.

What used to be their best weapon has mostly been firing blanks for the last month or so.

And while they didn't need it much to sweep off Tampa Bay in the first round, it could come in awfully handy when they face the Boston Bruins in an Eastern Conference semifinal later this week.

The Canadiens went 0-for-23 over the final eight regular season games with the man advantage and scored on only two of 13 chances against the Lightning, although one was Max Pacioretty's series-clinching goal with 43 seconds left in Game 4 in Montreal.

It has got to where they don't talk about scoring goals so much as building "momentum" off the power play.

"We worked on the power play (Monday) and we'll work on it more," coach Michel Therrien said this week. "We want to create momentum on the power play and we're working with that in mind."

Early in the season, they were scoring regularly until opponents started keying on P.K. Subban's big point shot. Since then, the Canadiens have had trouble finding a winning formula.

Subban looks to the 2011 Bruins as proof that a team can win even if the power play is struggling.

"The year they won the Cup, I don't think that had many power play goals," he said. "The power play is one thing, but I think the most important thing is generating momentum on a power play." THE CANADIAN PRESS

DRIVE 5

From the sporty new Toyota Camry and luxe Acura TLX to the fully redesigned Nissan Murano, the New York International Auto Show enjoyed more than its share of important launches this year.

2015 cars shine in N.Y.C.

The Alfa Romeo 4C will hit select showroom floors later this year with a 1.75-litre engine. ALL PHOTOS WHEELBASE MEDIA

TODD D. BURLAGE
www.wheelbasemedia.com

Given its late place in the auto-show lineup and a date immediately after all the sexy concepts debut in Geneva, Switzerland, each year, the New York International Auto Show is often overshadowed when it comes to debut headliners and breaking industry news.

But with many notable intros this year, the Big Apple left a big mark on the auto industry, with many automakers unveiling new and improved models during the 10-day show in Manhattan.

Ford spared no expense or hoopla in the launch of its Mustang tribute edition, but it wasn't the only manufacturer making headlines in New York City. From the green to the mean, NYC enjoyed more than its share of important launches this year.

2015 Toyota Camry
Highlighted by an unmistakable sportier look that mirrors more expensive Lexus, Toyota used the stages of New York to reveal the latest version of the top-selling sedan in North America 12 years running, albeit a couple of years earlier than expected.

Sleeker headlight housings, a more athletic platform, pronounced lines and the redesign of nearly every body panel (save for the roof) give it a sense of motion even when standing still.

2015 Acura TLX
Honda's luxury division is consolidating the TSX and TL models to create the TLX. The styling remains sleek, and the performance and power are plenty adequate with four-cylinder and V6 engine choices, but the in-cabin creature comforts highlight this new ride. The TLX features Siri Eyes-Free Technology for iPhone users, heated and ventilated seats, real-time traffic and navigation, and a thumping 10-speaker stereo system.

2015 Dodge Charger and Challenger
Bold is the best way to describe these remodelled rides that debuted in New York. The change is more obvious for Charger than the Challenger, and for good reason. The Challenger plays more of a retro roll and for 2015, it pays more homage to the 1971 model. The best part is a new interior and coming in a close second is a tail tuck that smoothes the lines to look more like the 2006 concept car that we all fell in love with. Engines return basically unchanged, although all can be had with an eight-speed automatic transmission. The 6.4-litre Hemi V8 is good for up to 485 horsepower (estimated). Dodge is using the relaunches of these two classics as the headline act for its 100th anniversary celebration this summer.

2015 Nissan Murano
From technology and efficiency to safety and styling, this full redesign was on proud display in New York. Nothing really changes under the hood from the 2014 Murano, but partly by shaving 130 pounds off the platform, Nissan promises 20 per cent better fuel mileage than its predecessor.

Alfa Romeo 4C
Dominating the list of sexy debuts in N.Y.C., Alfa Romeo returned to North America with its gorgeous 4C sports car, ending a 20-year absence for the Italian automaker since introducing its last all-in entry to the U.S. market.

The 4C will hit (very few) showroom floors later this year with a 1.75-litre turbocharged inline-four engine that will launch the 4C from zero to 96 km/h in less than 4.5 seconds.

2015 Nissan Murano

This part of your car is a thief magnet

Catalytic converter.
This component of your vehicle's exhaust system is full of precious metals, making it a theft target

AUTO PILOT
Mike Goetz
drive@metronews.ca

Vehicles have always held a special place in the heart of thieves. They steal whole vehicles. They steal loose stuff inside vehicles. They steal parts, even when they are attached quite seriously to the mother ship.

For the latter category, it used to be things like hood ornaments, car stereos and nice wheels, but these days it's more likely to be airbags and catalytic converters.

Converter metals vs. gold

• Gold	$1,300
• Platinum	$1,400
• Palladium	$800
• Rhodium	$1,200

Current per-ounce price (approximate)

You can significantly reduce your chances of having your steering wheel airbag ripped off by simply locking the doors. You don't have that security measure with your catalytic converter, however, which is part of your vehicle's exhaust system, and just hanging there under your vehicle (between the exhaust manifold and the muffler) and prone to take off like a Labrador retriever with everyone they meet — especially some new person with a sawzall and/or propane cutting torch.

Of course, catalytic converters are theft targets because they are full of precious metals. The metals are used as catalysts, when things get (purposefully) really hot inside the converter, to convert bad stuff (left over from the rarely 100 percent efficient combustion process) into more benign stuff.

Maybe you're like me and have a new appreciation for chemistry ever since Walter White and Jessie Pinkman got into all those cool shenanigans in Breaking Bad. If so, here's a quick rundown on the super-neat and pricey metals inside the converter and why they're there ...

Rhodium: A minor catalyst. Also used as an alloying agent to harden platinum and palladium. Melts at 1,966 degrees Celsius.

Platinum: A major catalyst. Platinum is deactivated in the presence of lead, which is the primary reason why we got rid of leaded gas.

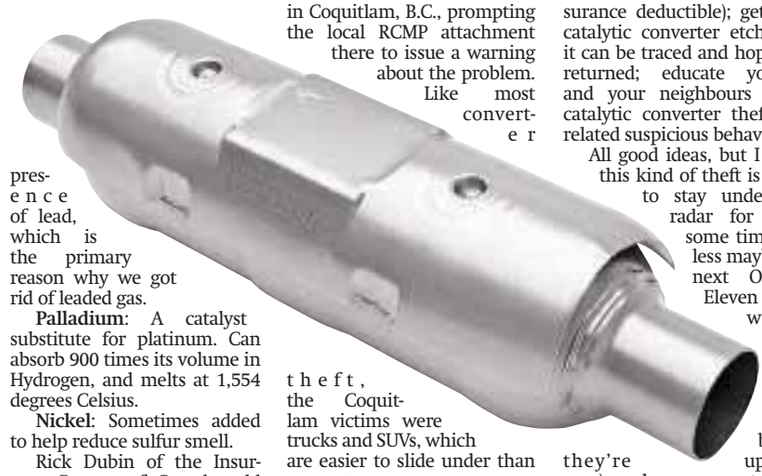
Palladium: A catalyst substitute for platinum. Can absorb 900 times its volume in Hydrogen, and melts at 1,554 degrees Celsius.

Nickel: Sometimes added to help reduce sulfur smell.

Rick Dubin of the Insurance Bureau of Canada told me catalytic converter theft is a persistent, nationwide problem that doesn't seem to be getting better or worse. But there has been a spate of converter thefts over the last year in Coquitlam, B.C., prompting the local RCMP attachment there to issue a warning about the problem. Like most converter theft, the Coquitlam victims were trucks and SUVs, which are easier to slide under than passenger cars.

The Mounties suggested a few ways consumers could protect themselves: Park in your garage; have extra metal welded to your exhaust system (maybe cheaper than your insurance deductible); get your catalytic converter etched so it can be traced and hopefully returned; educate yourself and your neighbours about catalytic converter theft and related suspicious behaviour.

All good ideas, but I think this kind of theft is going to stay under the radar for quite some time, unless maybe the next Ocean's Eleven (or whatever they're now) makes the number up to catalytic converters the desired objects of their next high-profile, high-stakes heist.



A catalytic converter. COURTESY WALKER EMISSIONS CONTROL

New cars thirstier? It's how they're tested

Fuel efficiency.
New testing procedure will result in more realistic fuel numbers

JIL MCINTOSH
drive@metronews.ca

It's not likely that gas prices are ever going to go down by much, which means many Canadians consider good fuel economy to be very important when buying a car. But when you look at the fuel efficiency figures on upcoming 2015 vehicles, they may look thirstier than the 2014 models.

It's not because they actually use more gas. Instead, Natural Resources Canada is introducing a new testing procedure that results in more realistic fuel numbers.

New test methods will make 2015 vehicles look thirstier, but it's just in the numbers. JIL MCINTOSH/METRO

"The government of Canada changed the fuel ratings to better reflect the fuel consumptions that (Canadians are) likely to achieve under today's typical driving conditions and driving styles," says Fabian Allard, deputy director at Natural Resources' Energy Efficiency transportation division. "We've been working with the auto industry on these changes for quite some time."

Fuel efficiency testing isn't done on a test track, but in a lab, since it's the only way to guarantee consistency. Engineers run vehicles on a dynamometer, and determine fuel consumption by measuring the amount of carbon in the exhaust.

Up until now, engineers have used a two-cycle test. The city test starts with a cold engine, takes 31 minutes, and runs at an average 34 km/h, with 23 stops. The highway test starts with a warm engine, takes 12 minutes, and runs an average 78 km/h. In each test, the lab temperature is set between 20 C and 30 C.

The new five-cycle test also uses these, but then adds a cold-weather city test with the lab -7 C; a nine-minute air conditioning test, with the a/c running and the lab set to 35 C; and a nine-minute test that includes acceleration and a top speed of 129 km/h. All of these factors typically use more fuel.

Automakers do the testing and forward results to Natural Resources. The government sometimes audits results if it thinks the numbers aren't right, or if a model hasn't been tested for a long time or has new technologies. Auditors will use real-life vehicles purchased for the testing.

The EnerGuide labels on 2015 models will explain the new system and numbers. On 2016 labels, you'll see information such as CO2 emissions, combined city and highway ratings, and comparisons with other vehicles in the segment. There will also be clearer information for alternative vehicles such as electric cars and plug-in hybrids.

Horoscopes

♈ Aries
March 21 - April 20
Some people won't hesitate to part you from your cash if they can see a way to do it. Don't be suspicious of everyone you meet today but remember there are bad guys in the world.

♉ Taurus
April 21 - May 21
There is no doubt you will achieve much over the next few weeks but you will achieve even more if you can persuade others to take on the boring chores, giving you more time for things that really matter.

♊ Gemini
May 22 - June 21
You may have to get tough with someone who has let you down. Don't go over the top and create unnecessary resentment but do make sure they realize this is the last warning they'll get.

♋ Cancer
June 22 - July 23
It's not easy being a role model but if anyone can do it you can. Be on your best behaviour today, set a good example and only do what is inspiring.

♌ Leo
July 24 - Aug. 23
You will come in for criticism of today but if you are smart, you will ignore it completely. At best it is misguided, at worst it is sour grapes. The fact is some people envy you for being such a larger-than-life character.

♍ Virgo
Aug. 24 - Sept. 23
Accusations will fly thick and fast today but none of the mud that is thrown will stick to you. It's not that you are whiter-than-white — you just know how to disguise what you do better than most people!

♎ Libra
Sept. 24 - Oct. 23
You must not take unnecessary risks today, especially with money. Keep your cash in your pocket and don't let anyone, no matter how smooth-talking, persuade you there is easy money to be made.

♏ Scorpio
Oct. 24 - Nov. 22
Cosmic activity in your opposite sign of Taurus means you won't get far on your own over the next few days, so let partners and loved ones and work colleagues know you need and value their support.

♐ Sagittarius
Nov. 23 - Dec. 21
Don't worry too much if you get behind in your work because there will be plenty of time to catch up later on. It would help, of course, if you were not so willing to take on other people's tasks.

♑ Capricorn
Dec. 22 - Jan. 20
Anything of a creative nature will go well for you but it will go even better if you make an effort to bring other people into your plans. Friends and loved loves want to help.

♒ Aquarius
Jan. 21 - Feb. 19
Focus on helping others today. Everyone knows you're talented but what they may not know is that you get a huge kick from doing good for others.

♓ Pisces
Feb. 20 - March 20
Socially, this will be a great day but some of your friends may be angry that you are spending more time with new acquaintances than you are with them. You can't help if you're popular. SALLY BROMPTON
